## PROJECTS

Slate |  Slate

A web app designed to help event coordinators schedule events by congregating participant calendar data. Uses Google Calendar API endpoints for input and Flask as the web framework to interact with end user.

Python Flask APIs SQL OAuth2

Humans vs. Zombies Bot |  HvZ-bot

A Discord bot to handle role management and statistics for RIT's Humans vs Zombies games. Uses Discord.js API and stores player data in a SQLite database.

JavaScript Node.js APIs SQLite Sequelize

NationsGame Rolls Simulator |  NG-Rolls-Simulator

A NationsGame competition simulator for division predictions and statistical analysis, originally written in Python, ported to JavaScript for use in Discord bots. Uses Discord.js and an undocumented NG-API to return processed player data to user.

Python JavaScript Node.js APIs
